Caution

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

Consult the dealer or an experienced radio / TV technician for help.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

WIRELESS FLEXI KEYBOARD INSTRUCTIONS

This 2.4 GHz Wireless Multimedia Keyboard is compatible with MAC, Windows ME/2000/XP/Vista operating systems.

This package contains the following:

- 1- Wireless Multimedia Keyboard
- 1- USB Receiver
- 1- User Manual

Requires 2 AAA Batteries. (Not included.)

The maximum transmission distance is approximately 30ft (10m). The operational distance will vary based on the environment in which the keyboard is used and the amount of interference encountered.

The receiver and transmitter have auto-recognition capability and have been preset to the same channel during production. Normally, you will not need to reset them during installation.

INSTALLATION AND CONNECTION:

STEP 1:

Remove the battery compartment lid on the left side of the keyboard and insert two AAA batteries as shown below. Please be careful not to load the batteries incorrectly. There are guide marks inside the compartment to make sure they are in the right direction. Replace the battery compartment lid.

STEP 2: Plug the USB receiver into the PC USB port.

STEP 3: Push the power keybutton to power on the wireless keyboard.

STEP 4: Press the connection keybutton on the keyboard, the blue LED indicator on the keyboard will flash. This indicates that the keyboard is connecting and functioning with the receiver. If successfully connected, the blue LED indicator is off, then the keyboard can work with the PC.

NOTE:

A. If you have completed the above installation steps, but the keyboard still does not function, the receiver and transmitter have lost auto-recognition and must be reconnected. To re-establish the connection, please press the connect button on the keyboard. The blue LED on the keyboard should flash quickly and then it is off. It shows that the keyboard is fully functional. If not, please repeat the recognition process until the receiver and keyboard are linked.

HOT KEYS GUIDE:

Following is a guide showing all the hot keys that are preset in this keyboard.

Please note mac user limitation: Multi-media hot-key functions are not compatible. F1-F12 function keys will also function differently between PC and MAC.
